Effective July 1, 2016, all covered members with medical coverage through the City's EmblemHealth GHI-CBP plan will be covered for certain "preventive care" medications with a \$0 copayment, including approved contraceptives (i.e. single source brand and generic prescription medication, multisource brand prescription medications with a "dispense as written" requested by the physician and certain "over the counter products" with a prescription from a physician). (A full description of all preventive medication and services covered by the EmblemHealth GHI CBP plan is available at [emblemhealth.com/city](http://emblemhealth.com/city).)

Accordingly, effective July 1, 2016, the Welfare Funds' prescription drug programs will provide only secondary coverage for prescription contraceptives for members and their dependent with medical coverage through the City's EmblemHealth GHI-CBP. You must first seek coverage for prescription contraceptives through EmblemHealth first before the Welfare Funds will consider any claims.

In Unity,

James Golden  
President
